## FNSACC613

## Prepare and analyse management accounting information

## Assessment 1

LA019399

## What you have to do

This assessment consists of six (6) tasks. All tasks must be completed.
You must use the Excel template provided under Resources required for this assessment

## Competency requirements

Students must achieve a satisfactory result in each task to pass this assessment.
If you do not satisfactorily complete any of the tasks (i.e. you do not achieve the nominated passing mark for that task) then you will be required to do a gap assessment or a resubmit of the entire assessment. Please note you will not be able to attempt the assessment more than twice.

To achieve a satisfactory result in this assessment you must achieve (at least) the following results for each task:

| Tasks | Marks available | Marks required to <br> satisfactorily complete |
| :--- | :---: | :---: |
| Direct and absorption <br> costing |  |  |
| Task 1 | 5 | 3 |
| Task 2 | 25 | 15 |
| Activity based costing | 7 |  |
| Task 3 | 15 | 5 |
| Task 4 | 20 | 10 |
| Task 5 |  |  |
| Process Costing | 28 | Satisfactory / Unsatisfactory |
| Task 6 |  |  |
| Result |  |  |

TAFE

## Direct and absorption costing

## Task 1 (5 marks)

The following data relates to Dott Ltd for the year ended 30th June 2018:

|  | Direct Costing | Absorption Costing |
| :--- | :---: | :---: |
| Sales | $\$ 600,000$ | $\$ 600,000$ |
| Net Profit | 254,000 | 252,000 |
| Inventories: 30th June 2017 | 164,000 | 176,000 |
| Inventories: 30th June 2018 | 156,000 | 166,000 |

## Required:

Prepare a Reconciliation of the difference between the 2018 net profits under direct and absorption costing.

## Task 2 (25 marks)

The Lake Side Company currently uses direct costing. The general manager has asked you to demonstrate the difference in profit or loss if they changed to absorption costing. The following information should be used.

The actual costs for July 2018 were:

| Cost | Units | Amount \$ |
| :--- | :---: | :---: |
| Sales | 6,000 units | $\$ 3000,000$ |
| Variable manufacturing costs |  | $\$ 48,000$ |
| Fixed manufacturing costs |  | $\$ 32,000$ |
| Fixed selling and administration |  | $\$ 30,200$ |
| Budgeted and actual production | $\$ 10,000$ units |  |
| Opening inventory | Nil |  |

## Required:

a) Prepare an Income Statement (Profit and Loss Statement) using direct costing
b) Prepare an Income Statement (Profit and Loss Statement) using absorption costing
c) Prepare a reconciliation of the difference between the net profits under direct and absorption costing.
d) Using a Financial Software package such as MYOB or Xero produce an Income Statement (Profit and Loss Statement).
i. Provide evidence of this report, either by including a screen dump of the report, or including a copy of the pdf version of the report.
ii. Name the Financial Software Package that you have used to produce the report.
iii. What is the Net Profit as shown on the Income Statement (Profit and Loss Statement)?
iv. Net Profit will be affected by whether management has chosen to use Direct Costing or Absorption Costing. Which of these methods would result in a higher net profit on the Income Statement (Profit and Loss Statement)?

## Activity based costing

## Task 3 (7 marks)

Calculate the application rate for each of the following activities using the cost drivers given (to two decimal places):

| Activity Area | Budgeted <br> Overhead Cost | Cost Drivers | Budgeted Level <br> for Cost Driver |
| :--- | :---: | :--- | :---: |
| General overheads | 350,000 | Total labour hours | 55,000 |
| Computer related costs | 150,000 | Machine hours | 20,700 |
| Maintenance | 40,000 | Number of requests | 580 |
| Stores Department | 200,000 | Number of store <br> movements | 24,000 |
| Support Labour | 750,000 | Support hours | 13,000 |
| Direct labour | $1,900,000$ | Direct labour hours | 42,000 |
| Factory related costs | $1,250,000$ | Machine hours | 52,500 |

## Task 4 (15 marks)

Black and White is a firm of tax advisors. You are provided with the following budget prepared using activity based costing principles:

| Activity Area | Budgeted Overhead <br> Cost | Cost Drivers | Budgeted Level for <br> Cost Driver |
| :--- | :---: | :--- | :---: |
| Professional labour | $\$ 720,000$ | Professional hours | 4,000 |
| Support labour | 228,000 | Support hours | 6,000 |
| Phones/faxes | 10,000 | Number of calls | 8,000 |
| Search fees | 40,000 | Number of searches | $\mathbf{2 , 5 0 0}$ |
| Photocopying | $\mathbf{2 , 0 0 0}$ | Number of copies | 5,000 |
| General overhead | $\underline{650,250}$ | Professional hours | 4,000 |
| Total costs | $\mathbf{\$ 1 , 6 5 0 , 2 5 0}$ |  |  |

One client required the use of the following cost drivers:

| Activity area | Use |
| :--- | :--- |
| Professional labour | 35 hours |
| Support labour | 30 hours |
| Phones/faxes | 90 calls |
| Search fees | 30 searches |
| Photocopying | 300 copies |

## Required:

a) Calculate the activity allocation rate to 2 decimal places
b) Calculate the total cost for the client.
c) If the firm requires a profit of $30 \%$ on cost, how much should be charged for this job?

TAFE

## Task 5 (20 marks)

Maxx Ltd now produces two products, a premium Lawn Mower (the Chopper) and an economy version (the Cutter). The prime cost (i.e. direct materials and direct labour costs) are $\$ 380.00$ for the Chopper and $\$ 300.00$ for the Cutter.

To produce the Chopper, it requires 3 hours of direct labour; and only 2 hours to produce the Cutter. Factory overhead is allocated based on direct labour hours. The total budgeted factory overhead was \$220,000 and direct labour hours were estimated at 8,000 hours.

The general manager has asked you to review the costing of these two products and compare the traditional method of costing with activity based costing. The details of the factory overhead budget and the identified cost drivers are:

| Cost drivers | Chopper | Cutter |
| :--- | :---: | :---: |
| Machine hours | 3.0 | 3.5 |
| Kilowatt hours | 4.2 | 4.5 |
| Maintenance requisitions | 0.3 | 0.7 |
| Purchase requisitions | 3.0 | 2.0 |
| Quality control inspections | 0.7 | 1.5 |

## Budget:

| Cost | $\mathbf{\$}$ | Cost driver | Units |
| :--- | :---: | :--- | :---: |
| Store handling | 84,000 | No. of requisitions | 3,500 |
| Electricity | 50,000 | Kilowatt hours | 6,580 |
| Machine expenses | 36,000 | Machine hours | 4,500 |
| Quality Control | 24,000 | Inspections | 1,000 |
| Maintenance | $\mathbf{2 6 , 0 0 0}$ | No. of requests | 500 |
| Total | $\mathbf{2 2 0 , 0 0 0}$ |  |  |

## Required:

a) Calculate the cost per unit for each product using the traditional cost allocation method.
b) Calculate the cost per unit for each product using activity based costing.

TAFE

## Process Costing

## Task 6 (28 marks)

Smithe Ltd manufactures Brass Ashtrays and uses a process costing system. Only one product is produced in a single process. Polished Metal is input at the start of the process. Each unit produced is a 3 centimetre high Brass Ashtray.

Units emerging from the process are transferred immediately to finished goods. Conversion costs include labour and factory overheads are incurred uniformly throughout the process.

The goods are inspected at the end of the process before they are transferred to finished goods. Any Spoiled units are removed. Spoilage is usually $1 \%$ of good output and is added to the cost of good units leaving production. Abnormal Spoilage is not included in the cost of goods transferred to Finished Goods.

## Production details for April are:

| Details | Units | Completion rate |
| :--- | ---: | :---: |
| Work in process 1 April | 1,000 units | $50 \%$ complete |
| Units started in April | 40,000 units |  |
| Work in process 30 April | 1,500 units | $50 \%$ complete |
| Units completed in April | 38,500 units |  |

## Costs details are:

| Date | Cost | Amount |
| :--- | :--- | :--- |
| Work in process 1 April | Material | $\$ 20,000$ |
|  | Direct labour | $\$ 4,000$ |
| Costs incurred in April: | Material | $\$ 800,000$ |
|  | Direct Labour | $\$ 318,000$ |

[^0]
## Required:

a) Prepare a cost of production report (process cost summary report) for the month of April, using weighted average inventory valuation, showing:
i. The physical units
ii. The equivalent units and cost per equivalent units
iii. The value of work in process at 30 April
iv. The value of inventory transferred to finished goods during the month.
b) Show the work in process account for the month of April

[^0]:    Factory overhead is applied at the rate of $\mathbf{2 0 0 \%}$ of direct labour cost.
